**MEGA** was created to promote high quality economic growth and job creation. Since their inception in 1995, MEGA tax credits have spurred an estimated \$11.5 billion in private investment and created nearly 120,000 jobs.

### **High-Tech MEGA:**

If you are an employer in electronics, communications, medical science and other high technology fields whose company devotes at least 25% of operating expenses to research and development, and you need a reason to expand or locate in Michigan rather than another state, you may be eligible for a high-tech job creation tax credit against the SBT. Each credit may be awarded for up to 20 years and for up to 100% of the tax related to the project.

These tax credits through MEGA (Michigan Economic Growth Authority) are designed to attract new, innovative and cutting-edge companies that specialize in new technologies. They are available to firms doing advanced computing, biotechnology, electronic device technology, engineering and laboratory testing related to product development, medical device technology, product research and development, advanced vehicle technology or technology that assists in the assessment or prevention of threats or damage to human health or the environment.

### **Manufacturing, R&D, Wholesale Trade and Office Operations**

MEGA tax credits are also available to companies creating good-paying jobs in manufacturing, R&D, wholesale trade and office operations that meet the criteria.

Contact us today if you believe you may qualify for this incentive.
